DROP

We have completely closed all the requirements that were in the project description.

4>models,
>2 FBV,
>2 CBV,
CRUD,
CORS,
etc. for the backend.

>4 events (clicks),
>4 form controls,
VERY COOL CSS styles,
using @for, @if, @else,
JWT authentication,
>1 Angular service use HTTP for use with the API for frontend.

Our website has:
